J. PRIVATE PROVIDER

The Building Official may approve private providers to conduct plans review and inspections duties in lieu of the municipal building department personnel as authorized by Florida Statute 553.791

An Owner may elect to use a Private Provider at any time. However, the Private Provider is recognized only after the Town of Medley reviews and accepts the “Notice to Building Official”. Private Provider services may include inspections only, or plans review and inspections. The Town of Medley will not

allow plans review only. The Private Provider’s role may be modified at any time by submitting a revised “Notice to Building Official”, subject to the restrictions set forth in the Policies and Procedures Manual. Private Provider plans review. Private Providers may review the following disciplines only: Building, Roofing, Structural, Electrical, Mechanical and Plumbing. All other disciplines (Zoning, Floodplain, Public Works, etc.) will be reviewed by the Town or outside agencies (Fire, DERM, DOH, etc.)

Fee adjustments for building permits. A reduction in base permit fees may apply, as follows:

- For plans review and inspections, the building department fees may be reduced by thirty percent (30%) and in no case shall be less than \$175.00
- For inspections only (or if the Town began to review the plans before the Private Provider election was finalized), the fees may be reduced by fifteen percent (15%) and in no case shall be less than \$175.00
- Base permit fees do not include local, administrative, impact or other fees outside of base permit fees or for those reviews and inspections actually conducted (e.g. Floodplain, Zoning, and Public Works).

PROCEDURES: Notice to the building official of use of private providers is a form indicating that the fee owner has elected to participate in the alternative plan review and inspection program. This form also includes information regarding the project, the qualifications of the private providers and duly authorized representative, as well as proof of the requisite professional and liability insurance coverage. The private provider plan compliance affidavit form is used by the private provider to attest to the building official the plans submitted by the private provider were reviewed for and are in compliance with the Florida building code and all local amendments to the Florida building code.

Note: The building official or his staff may visit the site as often as necessary to verify that the private provider is performing all required inspections. The building department will conduct all final inspections and inspection for assurance of temporary or final certificates of occupancy/completion. The building official may issue a stop work order if a threat to public safety or welfare exists. Upon completion of all inspections, the private provider shall prepare a certificate of compliance and summarize the inspections performed. The certificate of compliance must include a statement that the construction complies with the approved plans and the applicable codes.
