I have personally inspected the entire "Reinforced Unit Masonry" system for this building/project as referenced above. This inspection includes all of its components such as, reinforced poured cells, vertical and horizontal reinforcing bars, horizontal joint reinforcing for the blocks, and all associated tie beams, bond beams, tie columns, concrete pour, grout pour, etc.

I find that all aspects of this system conform to the "Approved Plans" and the Florida Building Code in effect for this building/project.
